

# Planet-Eco Software

The Planet-Eco software contains 12 different educational games that encourage environmental awareness and sustainability in children. Some examples of the games: children learn to turn off all appliances when they go out the door, recycle waste and keep the ocean clean to make animals happy too. The software allows children from 4 to 8+ years old to enjoy themselves.

All games are violent- and language-free and therefore suitable for all children. Arctic adventures can be installed on the 10, 17, 21, 32, 43 and 65 inch IKC touch screens.
